Experience

New Binary Solutions

Jan 2026 – July 2026

Full Stack Developer Intern

Kolhapur, Maharashtra

- Developed responsive and user-friendly web interfaces using React.js, Next.js, JavaScript, TypeScript, and Tailwind CSS, ensuring cross-device compatibility and a smooth user experience.
- Designed and implemented reusable UI components and prototypes using Figma, while optimizing frontend performance, responsiveness, and accessibility.
- Developed and integrated RESTful APIs using Node.js and Express.js, implementing server-side logic, API endpoints, and seamless frontend-backend communication.
- Performed backend debugging, API testing, and code optimization to improve application performance, reliability, scalability, and maintainability.

Projects

AI BioScan – Intelligent Health Risk Assessment System 🔗

- Developed a full-stack AI-powered health risk assessment platform using React.js, Python, and PostgreSQL.
- Integrated machine learning models for symptom analysis and real-time health risk prediction with personalized recommendations.
- Designed secure REST APIs, optimized PostgreSQL queries, and built responsive dashboards for health analytics and automated report generation.
- Implemented frontend-backend integration to enable seamless data flow between the React.js dashboard, REST APIs, ML models, and PostgreSQL database.

YouTube Video Summarizer 🔗

- Built an AI-powered application that generates concise summaries from YouTube videos using LLMs.
- Implemented transcript chunking and asynchronous processing for videos longer than 60 minutes.
- Optimized backend APIs and frontend rendering to improve application responsiveness.
- Developed REST API endpoints for transcript processing and LLM integration, handling requests efficiently for reliable summary generation.

Text-to-Image Generator 🔗

- Developed a Generative AI web application using Stable Diffusion for text-to-image generation.
- Reduced response latency through caching and optimized React state management.
- Containerized backend services with Docker for scalable deployment.
- Implemented REST APIs for prompt processing and image generation, with MongoDB integration for storing user data and generation history.

Technical Skills

Programming Languages	JavaScript, TypeScript, Python, SQL
Backend	Node.js, Nest.js, Express.js, REST APIs, Microservices Architecture
Frontend	React.js, HTML, CSS, Tailwind CSS
Databases	MongoDB, MySQL, PostgreSQL, Firebase
Cloud & DevOps	AWS, Docker, Git, GitHub Actions
Core CS	DSA, OOP, DBMS, Operating Systems, Computer Networks, System Design

Education

KIT's College of Engineering, Kolhapur	2022 – 2026
B Tech in Computer Science and Engineering (Data Science) — CGPA: 8.16	
Ichalkaranji High School and Junior College, Ichalkaranji	2021 – 2022
Higher Secondary Certificate (HSC) — 71.17%	
Urdu Highschool & Junior College, Rendal	2019 – 2020
Secondary School Certificate (SSC) — 91.00%	

Achievements & Certifications

- Institute level Project Based Learning Competition Winner (3rd Sem)
- AWS- Certified Cloud Architecting.
- Google - Google Cloud Career Launchpad Generative AI Leader track
- Walmart - Advanced Software Engineering Job Simulation
